

THANUJA SEWMINI

SOFTWARE ENGINEERING UNDERGRADUATE: FULL - STACK DEVELOPER

sewmini234@gmail.com | +94 77 600 5507 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Ambitious Software Engineering undergraduate at Sri Lanka Institute of Information Technology with experience in full-stack web development, Android application development, UI/UX design, and microservices architecture. Skilled in MERN stack technologies, Docker, Kubernetes, and modern development tools, with a passion for building practical and user-friendly software solutions.

EDUCATION

- SLIIT - Faculty of Computing (Undergraduate)**
BSc (Hons) in Information Technology - Specializing in Software Engineering (2023 - Present)
- Ceylon German Technical Training Institute**
Certificate Course in Electronics (E2)
Part-Time Training Programme (2024 - 2025)
- G.C.E Advanced Level**
Physical Science Stream (2020-2022)
Bandaragama Central College

SKILLS

- Programming languages: **JavaScript, Java, PHP, Python, C, C++**
- Frontend Technologies: **React.js, Tailwind CSS, HTML, CSS**
- Backend Technologies: **Node.js, Express.js, REST APIs**
- Databases: **MongoDB, MySQL**
- Tools & Platforms: **GitHub, Docker, Kubernetes, Postman, Figma, Android Studio, VS Code**

PROJECTS

- CareSync | Healthcare Microservice System** [GitHub](#)
 - Built a full-stack healthcare appointment management system using microservices architecture.
 - Developed appointment booking and doctor approval modules.
 - Added video consultation meeting generation functionality.
 - Integrated AI-based healthcare features to improve user experience and system efficiency.**Technologies Used:** MERN Stack, Docker, Kubernetes, Postman, REST APIs
- Zee Link | URL Shortener & QR Generator** [GitHub](#)
 - Developed a full-stack URL shortening platform with customizable short links.
 - Implemented automatic QR code generation for URLs.
 - Designed responsive frontend interfaces and RESTful backend APIs using MERN stack.**Technologies Used:** MERN Stack

- **SwapNest | Item Exchange Platform**

[GitHub](#)

- Built a second-hand item exchange platform with item listings and swap management workflows.
- Implemented user authentication, donation center management, real-time status tracking, and in app notifications.
- Performed unit testing, integration testing, and Performance testing to ensure system reliability and functionality.

Technologies Used: MERN Stack, Postman, REST APIs, Jest, Supertest, Artillery v2

- **FixItNow | Maintenance Request Web Application**

[GitHub](#)

- Developed a maintenance request management system for clients, administrators, and technicians.
- Implemented request submission, technician assignment, and real-time status tracking features.

Technologies Used: MERN Stack, Postman, REST APIs

- **DailyPulse | Habit Tracker Mobile Application**

[GitHub](#)

- Designed and developed a wellness tracking mobile application using Android Studio.
- Implemented habit tracking, mood journaling, and hydration reminder functionalities.
- Added notification and home-screen widget support to improve user engagement.

Technologies Used: Android Studio(Kotlin)

- **PetPal | Pet Care Management UI/UX Design**

[Figma](#)

- Designed a mobile application prototype for pet care and wellness management using Figma.
- Created interfaces for vaccine tracking, grooming schedules, reminders, and pet growth monitoring.
- Applied modern UI/UX principles to improve usability and user experience.

Technologies Used: Figma

CERTIFICATIONS

- Certificate in Electronics (E2) – Good Pass | Part-Time Training Programme
Ceylon German Technical Training Institute
